

i+likeTM Metaphysik

**Help to self-
help!**

Taking responsibility!

- The **burdens of civilisation** on people, animals and food are enormous.
- The **frequency** of change is getting faster.
- i-like is based on the **Tai-Chi principle** of natural regeneration.
- Classic, **traditional** expert knowledge and applications are used, and paired with the **latest** technology of the 21st century.
- i-like products always comply with the philosophy of "**regeneration**".
- In this way, a bridge is ideally built between old and new.

i-like's mission is:

«Help to self-help».

«Help to self-help».

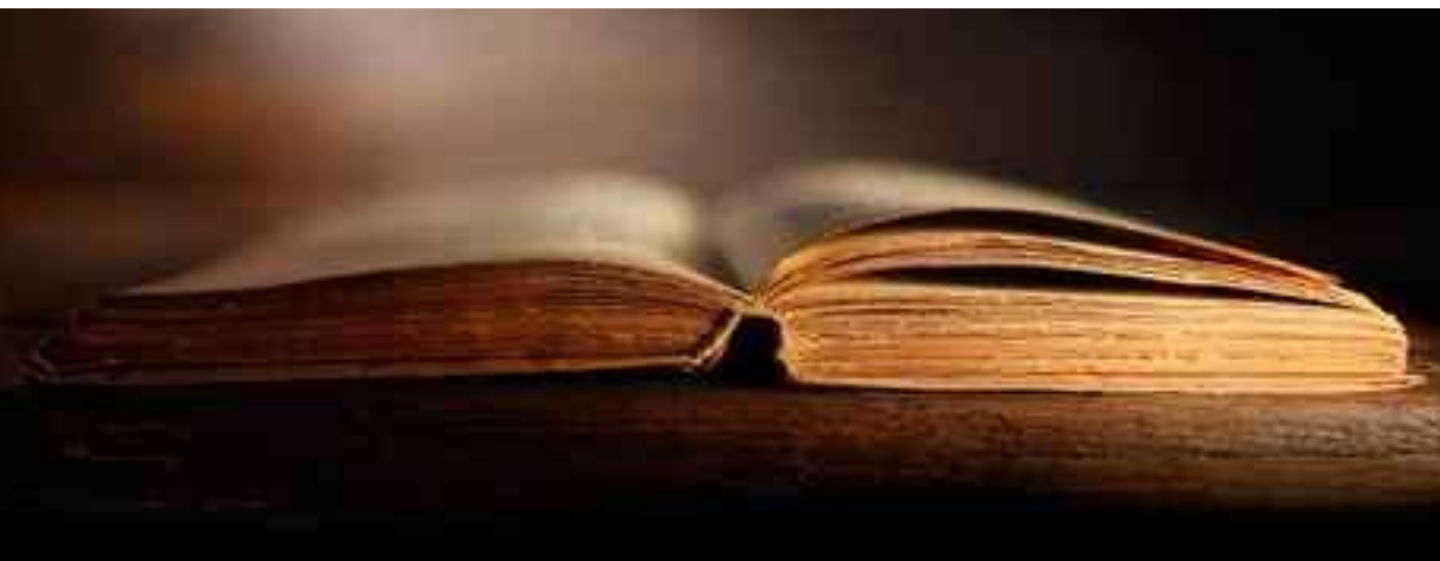

Important advice!

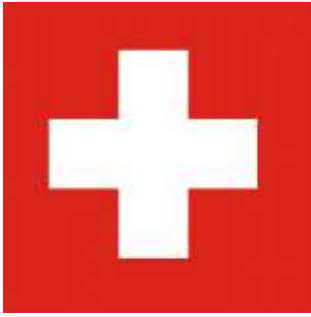

After long, careful development and creation, products emerged which cannot be replicated by any modern, fast technologies. Often metaphysics products are not only absolutely, exclusively produced in line with patents, but, for the most part, at I-LIKE we have our own raw materials and longstanding processing operations.

Therefore i-like bioresonance and vital products are, in direct sales with the client, ALWAYS offered with a personal consultation.

i-like supports the consultation through extensive training and further training measures. To this end, collaborations with universities and institutions are available.

Academy

Over 20 years of development Research and Development

The challenge!

i+likeTM Metaphysik

Something is changing at the moment!

■ Entwicklung der Weltbevölkerung

For over 1900 years, 50 million people per 100 years!

Suddenly in a century rather than 50 million, over 6 billion = 120x times faster growth!!

What's more - until 1950 there were «only» 2.5 billion. In 1987 there was a doubling (5 billion) - that is, after 37 years! The next 2.5 billion (that is, in total, 7.5 billion) was achieved this year, in 2016 - i.e. 29 years later! What's next?

It's becoming even more extreme!

150 years ago there was NO E-smog!

In the 1980s

The frequency of electricity/
electronics reached
50Hz in the 1980s
= 50 cycles per second!

Today

The frequency today has reached 2.5GHz
(giga Herz = 2.5 billion Herz =
2,500,000,000 x pro second).

That's an increase in frequency of
a factor of 500-million =
500,000,000x faster
in 30 years!

Everywhere...

There is scarcely a limit - E-smog occurs everywhere!

Here are two pictures - taken five years apart. Sermon by the Pope at the Vatican:

Between the upper and the lower picture there is ONLY a 5 year gap!

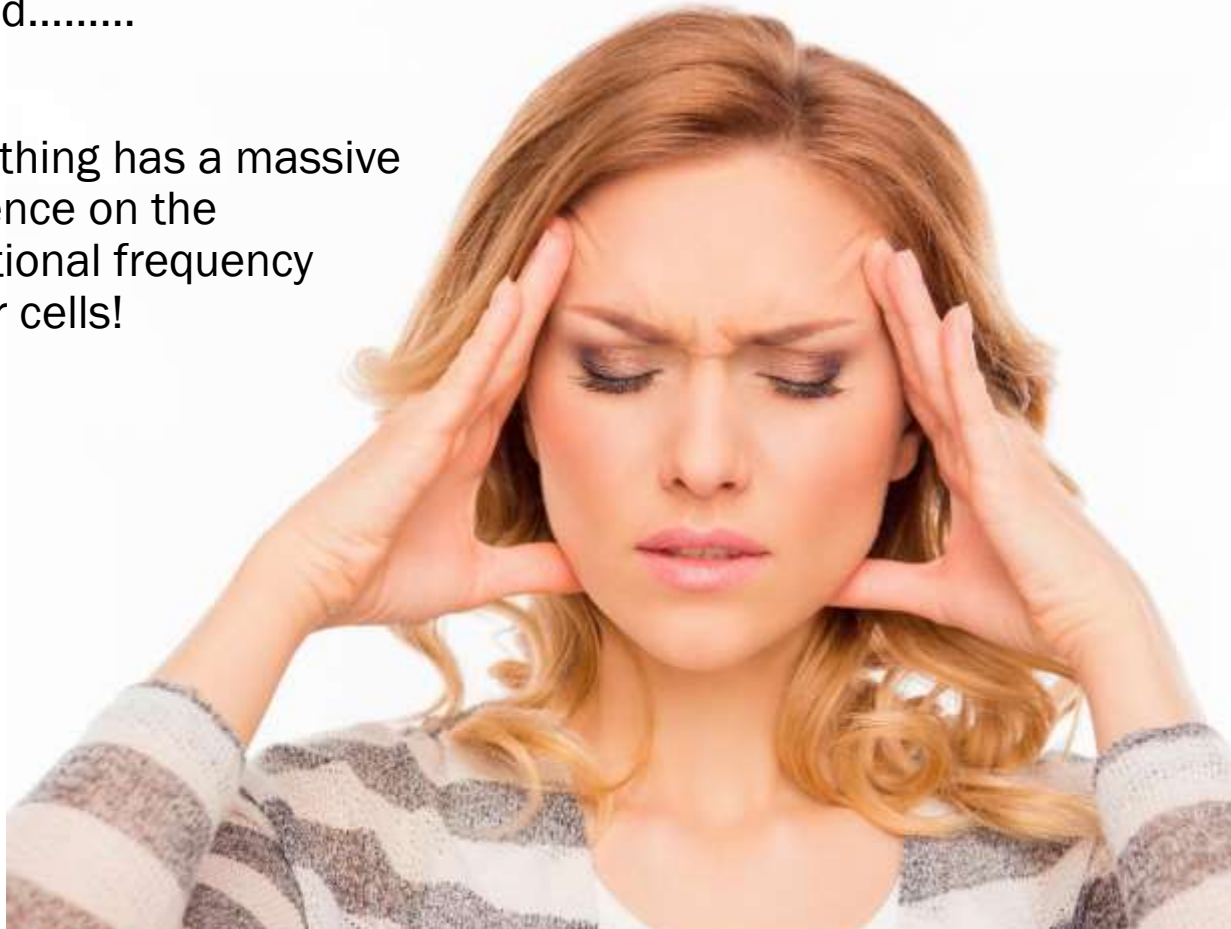

If anyone still believes that things are not changing a great deal, we are sorry to demonstrate otherwise.

More and more burdens

- The Faraday cage effect creates an e-smog problem in the car
- Solar panels with inverters generate massive amounts of e-smog
- Public transport is increasingly electrified
- Industrial food
- Medication
- Stress
- Bullying and other psycho-emotional stress
- Physical activity
- Increase in tobacco consumption
- Increase in Internet and TV consumption
- Increase in radioactivity
- Control by authorities is becoming more restrictive
- and.....

Everything has a massive influence on the vibrational frequency of our cells!

Solution?

Everything that exists on our planet - EVERYTHING - has a form of energy (frequency). Even our thoughts!

**The Tai Chi principle uses energy
to convert it into something positive.**

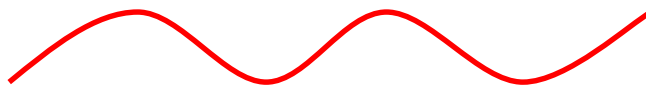

In this sense, it is a true BLESSING, the number of new, powerful frequencies which are currently being created on Earth! If we transform, revitalise and use them for ourselves, we are on the right track!

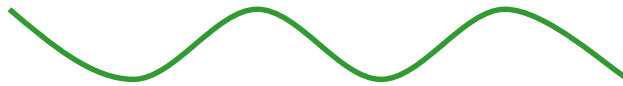

Technology

**Cancelling interference frequencies through
the programming of magnetite crystals!**

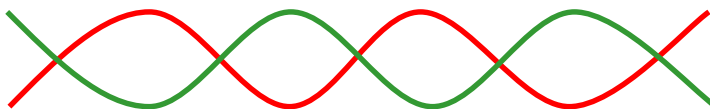

The goal is, through the charging of the bioresonant programmed Converter and the Vital products, to be able to neutralise the potential interference frequencies.

Frequency misinformation

Frequency misinformation reflected

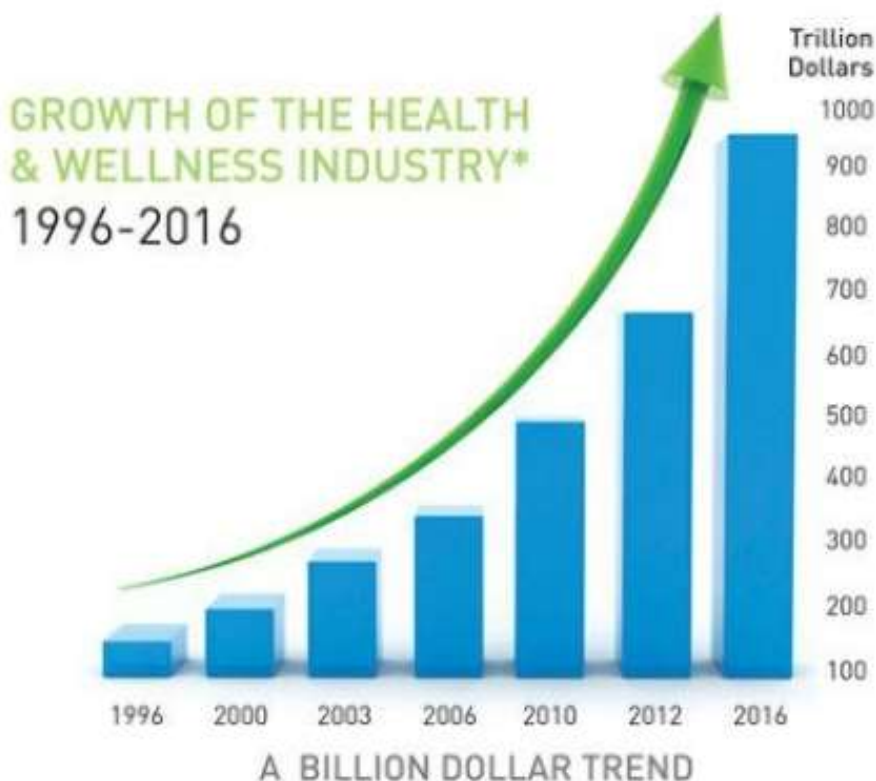

The two vibrations neutralise each other
and offset the misinformation!

The trend!

i+likeTM Metaphysik

Health and prevention

- Repair medicine has come under suspicion
- Excessive costs, health only for the «rich»
- The trends is clearly moving in the direction of **«retaining health, wellness, beauty, well-being» = prevention.**
- In the USA in 2015, the revention wellness healthcare industry had more sales made than the medical industry!

*Chart figures courtesy of Paul Zane Pilzer, economist

i-like is prevention

In the sense of "Help to self-help", i-like is entirely on trend!

With more than 20 years of research and development and a huge network of expert, professionals, developments, universities, etc., i-like has flourished with this trend.

Hundreds of thousands of experiences, customers, patients and consultants have a fount of knowledge which flows into the i-like bioresonant and Vital Products!

Electric smog?

i+likeTM Metaphysik

E-smog frequently fully misunderstood!

Up til now, E-smog has been measured via power, frequency etc.

The classic (outdated) scientific measuring methods are no longer adequate and have been replaced by new measurement methods directly from the cells of the recipients (human, animal, plant, water, etc.). Today we know it is the information of E-smog which can bring about loss of life.

But what IS electro-smog?

V/m, μ T, mW/m², μ W/cm², A/m, W/m², Gauss or what...?

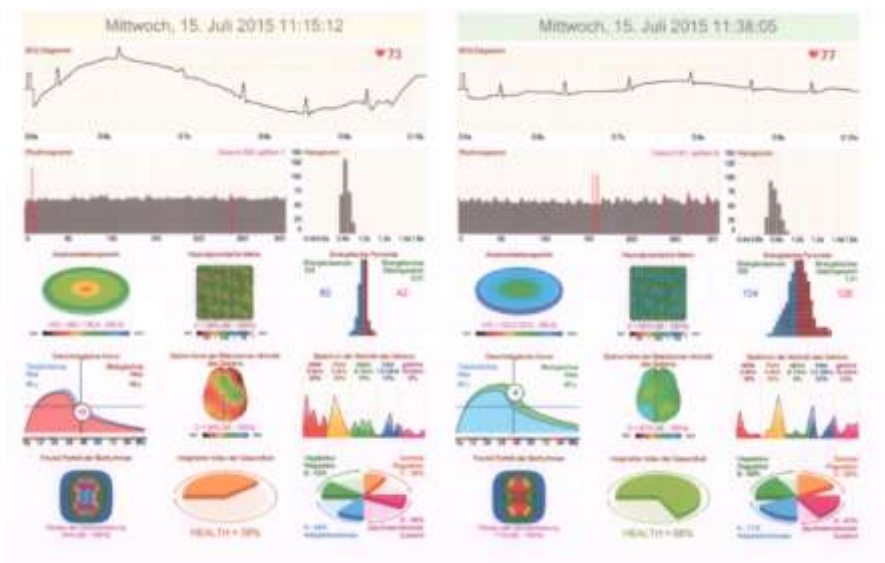

NO - E-smog consists of particles which break away from the electric / magnetic wave.

**They are not the wave itself!
They are also called leakage fields.
And THESE leakage fields (e-smog) disrupt the biologically relevant frequency of life - whether in humans, animals, food and so on .**

Measuring correctly is the new discovery!

- The impact of e-smog depends only partly on amount and frequency
- The adequate method of measurement is the inquiry into the biology of the body (human, animal, plants).

The latest methods of measurement from the field of medicine, bioresonance, fulfills the task of verifying the direct effect of electro-smog and other types of interference on people.

The E-Smog problem

Electro-smog causes some:

- Frequencies **interfering** with communication of body cells
- E-Smog causes a high **acidity** (PRAL kidney)
- Impaired concentration
- Sleeping problems
- Many diseases

Electro-smog arises wherever technologically created electric, magnetic and electromagnetic fields occur!

i+like TM
Metaphysik

Why not simply stop the radiation?

It does not work!

Commercial mobile phone chips try to reduce the radiation of mobile phones. That absolutely does not work!

If it did work, the mobile phone would no longer function!

E-smog

The danger is only now being recognised, thanks to the latest measurement methods!

- In the USA, mobile phone providers have begun to write that you should use the device only from a distance of 1m (in the instructions). What nonsense!
- In the USA and Europe, the court decisions are accumulating due to tumors, which have been demonstrably caused by electro-smog!
- The biggest insurance company in the world (Lloyds) has excluded any liability for damage caused by e-smog from all its policies since 07/02/2015 (and what insurance is NOT in league with Lloyds ?? The directive applies to virtually all contracts)

Lloyds of London schließt Haftung für Schäden durch elektromagnetische Strahlung aus Juni 30th, 2015 ·

Lloyds of London (ein internationaler Versicherungsmakler mit Sitz in London) schließt jegliche Haftungsansprüche für Schäden aus, die sich direkt oder indirekt, auf elektromagnetische Felder, elektromagnetische Strahlung, Elektromagnetismus oder Radiowellen zurückführen lassen.

Dies ist eine neue Richtlinie vom 7. Februar 2015, zitiert aus einem Grundsatzdokument der CFC Underwriting Limited, eine der Versicherungsgesellschaften von Lloyds of London. Sie schließt jede Abdeckung der Risiken, die mit der Exposition gegenüber nichtionisierender Strahlung verbunden sind, aus und wird standardmäßig auf den gesamten Markt angewandt.

Der Zweck der Richtlinie ist, die Folgen langfristiger Exposition gegenüber nicht-ionisierender elektromagnetischer Strahlung, wie zum Beispiel der Mobilfunkstrahlung, vom Versicherungsschutz auszunehmen.

What can remedial action achieve?

Bioresonance

All life consists of vibrations (frequencies).

With bioresonance, cell vibration is harmonised.

Bioresonance is produced through two processes:

1. **Self-regulation** - a healthy cell harmonises itself (biophoton reflection)
2. **Send out information** (scalar waves, Meta-Converter, acupuncture, herbal / natural healing, reflexology zones etc) and, as a result, harmonise negative frequencies (vitalise).

For his evidence that all that is «MATERIAL» consists of a minimum 1: 1 billion ONLY of vibration (information), Prof.Dr.Dr. Carlo Rubbia received the Nobel Prize.

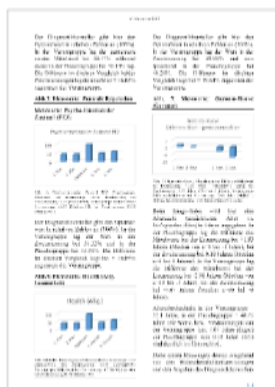

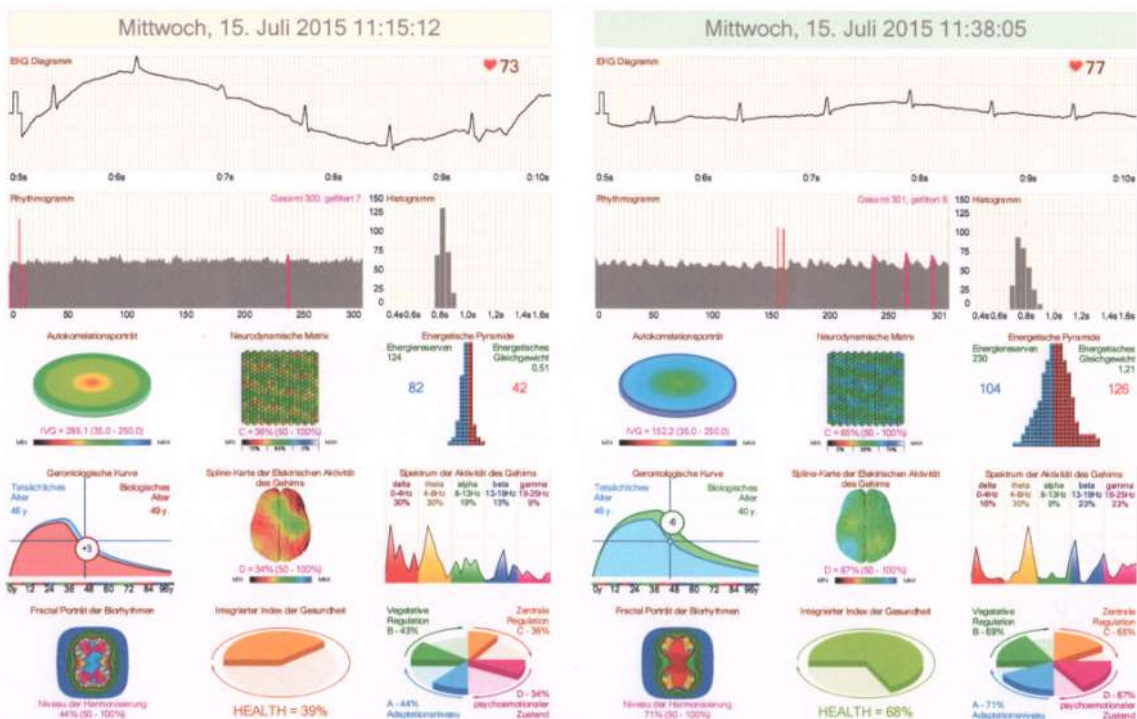

Natural medicine and today quantum physics proves:
«everything is vibration!»

i+like™
Metaphysik

Where is the disruptive e-smog?

Sources of e-smog?

E-Smog, which is disruptive to our cells, is created whenever electricity is **produced-transported-consumed** by humans.

It is therefore important to vitalise devices, but also outlets etc.!

Use the manual!

You can make a longer phone call, work reassured at the computer screen, enjoy the reading light and find yourself in a wellness oasis of good vibrations!

For whom?

Always, wherever electricity is being used!

- Adults and children
- Smart phones, mobile phones of all kinds
- Screens and televisions
- Computers and printers
- WLAN router
- Sockets and switches
- Light sources of all kinds
- Vehicles (special Converter)
- Kitchen equipment
- Photovoltaic (special Converter), and much more.

i+like TM
Metaphysik

Self-regulation and positive influence!

i-like vitalises

We use existing electromagnetism (electro-smog), to transmit the information from the e-chip on the cells!

(bioresonance principle).

The chips consist of:

a) pyramidal shaped minerals for self-regulation and

b) magnetite crystals, which are directed by scalars and achieve a specific task, depending on the chip (unique in the world!)

Self-regulation and positive influence!

The i-like Converter is a highly complex instrument. It is based on new insights from physics (magnetic waves, scalar waves, self-field-theory¹, field mirror effects¹ etc.). The unique design of the i-like-Converter (combination of different mineral crystals and geometric pyramid shapes) means that the i-like chip is capable of restoring essential magnetic fields within the body in 6-8 times density in the body, for health and well-being. Glued to a device with an electromagnetic field or electric field voltage this can additionally help to improve the resonances of people's vital own field radiation (additional resonance body).

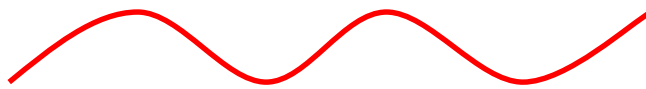

¹ Explanation in accordance with Meyl physics

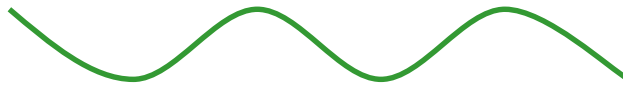

Technology

Cancelling interference frequencies through the programming of magnetite crystals!

The goal is, through the charging of the bioresonant programmed Converter and the Vital products, to be able to neutralise the potential interference frequencies.

Frequency misinformation

Frequency misinformation reflected

The two vibrations neutralise each other and offset the misinformation!

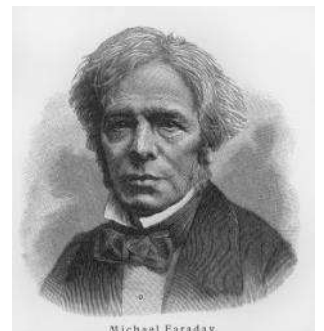

Car E-Smog Converter

i+like TM Metaphysik

E-smog in the car?

Danger for vehicles (of all kinds) -
Faraday cage
is called a "driving microwave"
in insider circles!

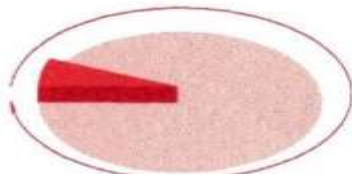

People are measured

Clients are measured after one car journey without a Converter.

To do this, normal, every day vehicles are used, and the journey is of around 30-45 minutes.

The result is ALWAYS: stress, loss of concentration, loss of power in the cells

Prior to activation of the vehicle, after 30 minutes drive: Health-volume 9%

A value of 9% before the fitting is an extremely poor health value.

**Gesundheits
Campus**

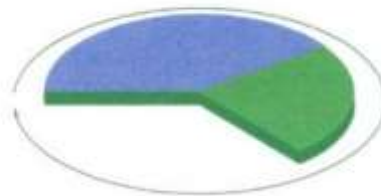

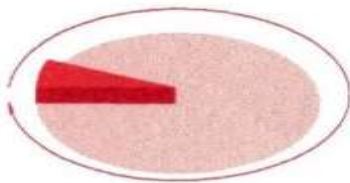

Aussenstelle für das deutschsprachige Europa der St. Elisabeth Universität

Test result with and without Converter

Combustion engine vehicle, vehicle from the year 2013, fitted with many electronic aids, Bluetooth, adaptive cruise control (radar) etc.

- The results are collected from the driver BEFORE the fitting of the vehicle with Converters, measured after 30min. The drive was measured
- "After" the vehicle was fitted with three Converters. The driver now had a route of about 45 minutes to get through. Subsequently, the second measurement was carried out.

1. Result: regeneration level (self-regulation)

- Left **Prior to activation** of the vehicle, after 30 minutes drive: **Health-volume 9%**
- Right **after the activation** of the vehicle, after 45 minutes: **Health-volume 64%**

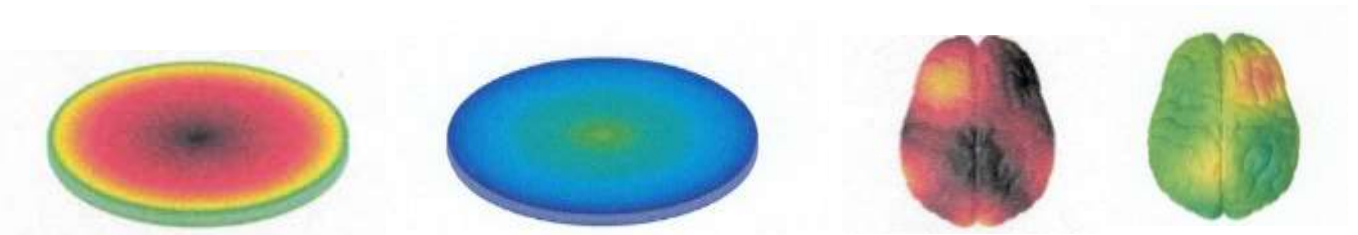

A value of 9% before the fitting is an extremely poor health value. The value after the ride of 64% in the kitted out vehicle is a great contrast and is well above the norm for a man of 52 years.

Test result with and without Converter

Combustion engine vehicle, vehicle from the year 2013, fitted with many electronic aids, Bluetooth, adaptive cruise control (radar) etc.

- The results are collected from the driver
BEFORE the fitting of the vehicle with Converters, measured after 30min. The drive was measured
- "after" the vehicle was fitted with three Converters. The driver now had a route of about 45 minutes to get through. Subsequently, the second measurement was carried out.

2. Result: stress level and self-regulation (autocorrelation)

The left shows the auto-correlation and the spline map (right brain) in each case the **stress level before (left) and after (right) of the activation of the vehicle with the i-like Converters.**

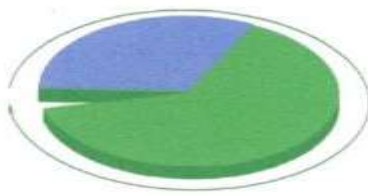

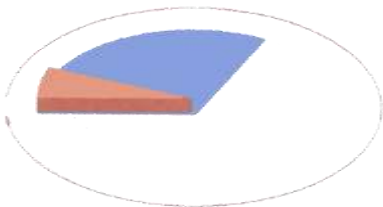

i+like™
Metaphysik

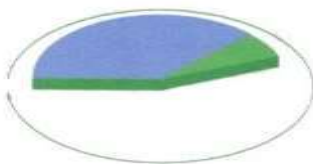

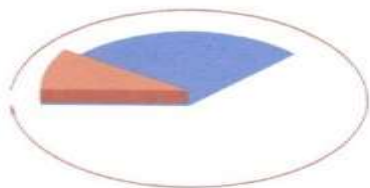

Other measurement results

Electric vehicle (Tesla) -
before 40min journey time 9% (very poor!) - after 45 min journey time 98% (extremely good!)
Male, 46 years old

Truck (Mercedes 3245) - before full day trip 13% - after 30min. drive 44%
Male, 41 years old

i+likeTM
Metaphysik

Typical reactions

to the revitalization with the car Converters are:

- Greater relaxation whilst driving
- Lower energy consumption thanks to a more relaxed driving style
- Reduced risk of accidents due to higher concentration and attention
- Absence of headaches and other tension pain
- Reduction of stress-induced hyperacidity
- Significant performance improvement with the possibility of being able to drive much further without getting tired

Measurement in racing

Car Converters in racing

Histo-Cup, June 17, 2016, Salzburgring
Professional racer Gottfried Pilz, Formula BMW Challenge driver

Test conditions:

1. Testing before training
2. Testing after the 1st session (30 min training)
3. Testing after the 2nd session (30 min training)

Before the 2nd session (3rd measurement), the vehicle Converters were attached. In other words, during the last session (which was the hardest, no breaks or interim measurement, full speed all the way through) the racing car was equipped with i-like car E-Smog Converters.

Car Converters in racing

Measurement results

1. Testing: Health-volume (regeneration level) 87%
(very vital person!)
2. Testing: **Health-volume 8%** (massive hyperacidity, stress level is extremely high (spline) and regeneration volume practically no longer exists!)
3. Testing: **Health-volume 47%** (great recovery, minimal stress, regeneration volume above average level)

Summary:

- After the 1st session both the body and mind were exhausted and barely capable of concentration.
- Normally after the 2nd session the condition would be measured as even worse (2x complete load). However, with the Converters a striking, more than 5 x better health value, acidity value, stress value be measured That means that with the Converters the professional racer driver is vital, concentrated and fully capable of regeneration, despite racing stress.

The bottom line:

With the Car E-Smog Converters of professional racing driver is clearly more powerful (mentally stronger) and the regeneration is already working in the vehicle (known as the Schumacher effect).

Since then, G. Pilz has installed Converters in his vehicle for several races. Result: he leads the challenge by a wide margin (33 racers)! We congratulate him!

The Life Stream TV team was promptly on the spot and immediately documented the special performance.

Photovoltaic E-Smog Converter

iolikeTM Metaphysik

E-smog in photovoltaics!

In a photovoltaic system, the e-smog occurs in the power converter. It is again important to realize that neither the frequency nor the strength of the radiation is crucial.

The distance that e-smog has been detected away from the inverter was between 15 m and 50 m. This means that a single family home or a barn is usually completely contaminated by e-smog!

What can you do?

With the i-like photovoltaic Converters, the e-smog's directional field is reversed. That means that e-smog is converted into a normal electromagnetic wave which is not destructive to living cells.

I-like calls that «**vitalisation**». The process complies with the principle of **bioresonance**.

An inverter which has been kitted out with i-like Converters radiates bioresonance waves throughout the entire house!

i+like TM
Metaphysik

Measurement results as an example

Testing evidence and measurements:

The 1st measurement was made prior to the fitting of the i-like Photovoltaic Converter onto the system's inverter.

The 2nd measurement measured 30-45 minutes after the the fitting of the Converter onto the house of the inverter in question.

Individual 1, male, born in 1961. Monday, February 22nd, 2016

Health measurement, base point at 9% shows significant deficiency signs and a high stress level. 30 minutes after the activation with the photovoltaic converter, the level is already above normal level.

Individual 2, female, born in 1964. Monday, February 22nd, 2016

Health measurement, base with 47% slightly above average (statistical 36%). 45 minutes after the activation with the photovoltaic converter, the level has risen again to an almost ideal 75%..

**Gesundheits
Campus**

Aussenstelle für das deutschsprachige Europa der St. Elisabeth Universität

Application / usage

For each inverter, 1 Converter.

Each Converter contains 6 individually programmed chips that connect through the metal Converter.

Experience report

Photovoltaic-Converter

A good four years ago we had a photovoltaic system installed in the stable of our farm.

Since that time, everything has gone haywire. We might have accepted that the mastitis (inflammation of the udder glands), calf death and many other ominous diseases as simple coincidence, but for the fact that for just for 4 years, but we have a clear proof that the system on the roof, and above all the inverters in the stable have had a massive influence on our lives.

Our animals live in an open, organic cow barn. In addition to the cows also mice, birds, many insects and occasionally other animals such as hedgehogs, martens, etc.

About three weeks after the installation of the system four years ago not a single animal - except the cows - was to be found in barn anymore. No birds, no mice and, after a few months, no new spider webs to sweep away.

Since we installed the Converter on the inverters in our barn, swallows have moved back in. I have long watched them and regarded them as a gift of from heaven.

We are really very grateful for the help and hope soon to also see an improvement for our cows.

Food-Chip

For the vitalisation of food!

i+like TM Metaphysik

Not just food, but life giving food!

Foods are often deprived of their "life".

The vitality (vibration) has been destroyed, the product is sprayed with many substances and treated (fungicide, anti-bacterial, anti-parasite, additives for shelf life, taste, colour, and more makes for "dead" food).

The i-like Food-Chip revitalises all food!

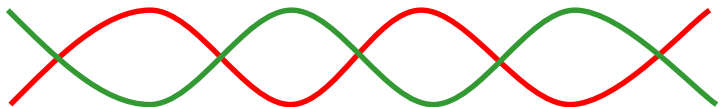

i+like™
Metaphysik

For example, spices: they have an especially high amount of Qi (food energy)

How does it work?

- Food is often, even at its origins, confronted with materials (frequencies) which are not beneficial for it.
- Many of the products available are already losing their natural relationship to their origins, the ground and the Earth and, of course, to the organisms (agriculture) whilst still in the ground.
- Everything must move quickly, generating a high income and remaining stable.
- Everything that is «put on» to food during its growth is transferred to the body.
- The harvest (machines), processing (heat, chemical changes, durability, colour, taste, etc) and cooking (stove, overheating, addition of synthetic substances, such as glutamate, etc.) afflicts the food even further!
- Everything enters our body.
- The Food-Chip removes exactly THESE negative frequencies!

An example from food production

2 weeks in the fridge - without example: manufacturer of anti pasti activates the test 2B with a chip during the production. After both tests are kept for 14 days in two different fridges.

The result is amazing!

Without Food-Chip

With Food-Chip

What happens with industrial food (dead food)?

A test with UHT milk. UHT = ultra high temperature That means, every kind of life has been removed from the milk. No bacteria survive. This milk is «very dead» and can no longer ferment. It just turns rancid, slightly sour.

The test is performed at room temperature over 4 days.

2 glasses with milk - one with, the other without a Chip. The glasses were set at least 5 metres apart.

After 8 hours, with a Chip is already sour.

After 4 days - with Chip, the milk has turned into quark, without a Chip, the milk is still liquid (rancid, slightly sour - that's all).

Conclusion: the «dead» milk can be enabled again with the Food-Chip and a vital food with natural properties emerges!

Self test...

Pour out an «ok» wine or a «cheap» 2-star Balsamic vinegar into two glasses (good).

One glass stands on a Food-Chip, the other not.

PLEASE NOTE! The glasses must be at least 3 metres apart and the Chip must not have previously been near the bottle!

Allow the Chip to work for 15-30 mins. Then take both glasses and let the test person smell each (and you, of course, as well). Note the difference after such a short space of time. It becomes even clearer if you activate the bottle of wine with the Chip for 24 hours.

Typical experience with the Food-Chip

I have a terrible food allergy. I react very badly to the sprays on grapes. Until now I have only been able to eat them if I wash them first with boiling water - and then only 4-5 grapes before the reactions begins again. You can only imagine what the "cooked grapes" look like.

Now I put the grapes, which I wash with cold water, onto the Food-Chip for a while and can each an entire bunch in one go without any reaction. I am very excited!

I had a couple of ladies visiting me and I showed them the Food-Chip. We tested something straightaway - I had two lemon yoghurts in the fridge, which were already past their sell-by date. We opened one of them and put in a Chip and left it in the neighbouring room. The second we opened up and left. After a couple of coffees and some gossip, we had a look at the two yoghurts. The yoghurt without a Chip was unpleasant and smelled very unappetising. Then we went into the neighbouring room to test the second yoghurt. And we all remarked that between us we had never eaten such a lovely lemon yoghurt...!

Animal-Chip

For pets!

Better balanced.

More vital

i+like TM Metaphysik

Healthy, contented pets. Vital and balanced.

Suitable for all small animals up to about 50 kg.

Functioning radius for the activation of the programming of around 50 cm.

Its effectiveness can be strengthened through metal (such as the food bowl).

1. Self regulation (own field resonance)
2. Special frequencies for the harmonisation against disruptions
3. Possible vaccine side effects are resolved (not the vaccination)

i+like TM
Metaphysik

Typical experiences with the Animal-Chip

Our family dog has been in chronic pain for the past year. He is limping. The vet has only been able to help him using cortisone and we know that it's not really good for his health. We have kept the Animal-Chip bandaged onto the location of his pain for 10 days. It is obvious that his pain has completely disappeared, because the dog runs and romps again, like he did a year ago. We have also stuck a chip to his food bowl and by one of the places he sleeps. So, three items in total. For us it has been worth it, and the result has really impressed us.

Our neighbour's dogs are constantly barking in the garden. We find this unpleasant. Using a pretext, I gave our neighbours an Animal-Chip. Officially, of course, simply to improve their health. However, my intention was to see what happened with the barking. The result has really amazed me. A few days after my gift of the chip, my wife (who did not know about my present), commented: "Don't you think that the neighbours's dogs have become a lot quieter?" I then revealed to her about the chips. She can scarcely believe it, that it is due to the chips. However I am convinced that the chips are the reason for this change in their nature.

Horse-Converter

i+likeTM Metaphysik

The Horse Meta-Converter

With the Horse Meta-Converter specific information is conveyed, which is tailored precisely to animals.

Through this information, the self-regulation of the horse is activated for an improvement of well-being.

The Horse Meta-Converter has an operating radius of 1-2 metres. It comes in a high quality box including a practical bag. The effectiveness of the Horse Meta-Converter is further reinforced with metal. In addition, the box protects against losing the valuable Horse Meta-Converters.

Suitable for all horse breeds (from ponies up to heavy horses)

i+like™
Metaphysik

Typical experiences with the Horse-Converter

My Freiburger's recurrent airway obstruction (disease of the bronchial system - note the editorial) has been chronic for months. Alternative remedies have not helped, we had to resort to cortisone. Shortly after finishing the course of cortisone the illness flared up again and was severe. We were desperate. A friend suggested I deal with the issue of bioresonance and seek help from the Swiss firm i-like. I then used the Horse-Metal-Box and after 7 days my horse was free of symptoms. I don't know whether it was now really only the box or all the circumstances combined which have helped. But what is certain is that I am very grateful for this new opportunity. In any case, the box is staying on my horse, when riding it is directly on me and I also get a really good feeling from it.

Our horse could hardly move. The vet said that he could barely take away his suffering any longer. In our distress we had tried everything. So far nothing had helped. Now we have got the chip from a friend and put the chip onto the horse blanket. After a day, our horse has completely changed. The Chip has now been there for two weeks and we are of the opinion that the pain has completely gone, because the 14-year-old animal is moving again just like the young animals surrounding it. Our experience with the Chip has been spectacular and, for a doctor like me, incomprehensible!

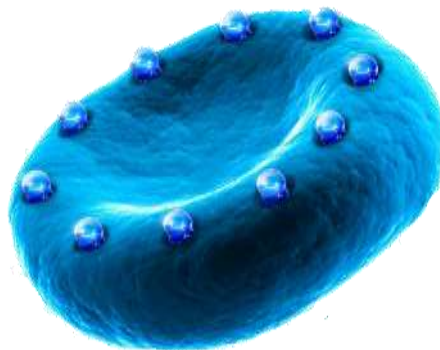

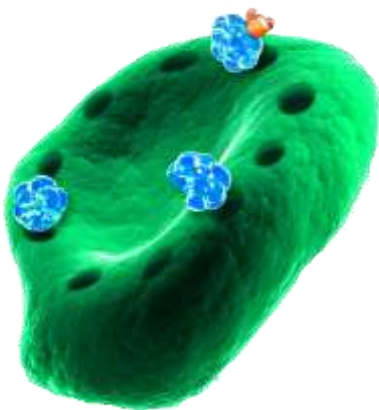

Water-Chip

i+likeTM Metaphysik

Vital water!

- Water molecules are aligned, vitalised.
- Water droplets are enclustered, hexagonal water is created.
- Pollutants cannot attach themselves to hexagonal water! This means that the body absorbs no toxins via the water when the water is enclustered.
- Reduction oxidation (redox) potential can be reduced. This is the environment where the water is currently located (people, frequencies all kind) significantly (redox is unstable)!

i+like™
Metaphysik

Use

The Water-Chip has a sphere of activity of around 50 cm (spherical).

The ideal activation time is 24 hours. Shorter or longer is also fine.

Only water is activated by this Chip. For other beverages, the Food-Chip should be used.

For large vessels, a Chip should be installed every 50 cm, so that all the water can be activated.

Bioresonance

All i-like Vital products are activated with the latest technology through bioresonance.

This offers many benefits:

- higher efficacy of the products
- neutralising of potential disruptive frequencies
- better tolerability
- increased absorption capacity (receptivity)
- activation of additional functions

Philosophy of regeneration!

Over one thousand years of accumulated knowledge of holistic regeneration stands behind **i-like**.

The insights of health and healing enjoy a long tradition in the cultural circles of the West as well as the East and are recognised to the highest degree (Druids, Celtic medicine, traditional Chinese medicine).

Distilled information and high-quality products have the goal of supporting people in their quest for health and well-being. The unique concept seeks to inspire people that, at all times, they are moving their body and mind towards a new start.

I-like Vital products are:

- balanced in YIN and YANG (also thermal)
- all the five elements of TCM are included in each product and ingredients, colours, thermal effect, sapor (taste) are in themselves naturally balanced
- (100% nature, also certified vegan)
- Acid-alkaline regulated
- free from allergens and free of harmful ingredients
- high concentrations thanks to extraction and reduction of the active ingredients

Die Anwendung von Fußpflastern von Dietrich Klinghardt

Schwerpunktthema

Pflaster, Umschläge und Zugschleifen wurden in der Medizin schon seit Tausenden von Jahren eingesetzt. In Europa sind es oft die keltischen Pflaster, die zur Eingriffung der Lymphdrüsen eingesetzt wurden. In der USA verwenden wir sie seit vielen Jahren die im frühen Teil des 20. Jahrhunderts von dem Mediziner Edgar Cayce empfohlene Fibrosin-Packung auf der Lute.

Seit etwa 5 Jahren verwende ich in meiner Praxis immer häufiger die aus dem asiatischen Raum stammenden Fußpflaster, die seit 2 Jahren unter dem Namen Vitalpflaster in Deutschland auf den Markt gekommen sind.

Es gibt verschiedene Produkte, die verschiedene Inhaltsstoffe haben und verschiedene Qualitäten. Hier ein paar Gedanken und Anregungen dazu:

Die Pflaster haben 3 grundsätzlich unterschiedliche Wirkweisen:

1. Zugschleifen Wirkung: die Substanzen im Pflaster ziehen über die Haut Substanzen sowohl aus der Lymphe, als auch aus den oberflächlichen Blutgefäßen und aus dem Gewebe selbst. Bei dieser Anwendung sind die Pflaster feucht und ändern die Farbe.

2. Die Pflaster haben einen rein energetischen Effekt: sie beeinflussen das darunter liegende Gewebe auf physikalische Art und Weise über das Aufschleichen von Frequenzen. Bei dieser Anwendung bleibt das Pflaster trocken (wird aber oft hart durch die gezielte elektromagnetische Eingriffung der Haut und durch das Vorwürgen von Schweiß).

Aus diesen 3 Prinzipien ergibt sich die Anwendung. Ist eine Eingriffung erwünscht, sollte das Pflaster auf Hautstellen geklebt werden, wo der Körper naturgegeben Substanzen abgibt. Die effektivsten

Körperstellen sind die Achseln (Linsenregion) und die Fußsohle, die Klitoris, wo sie am meisten und lassen sie die Anwendung dort 2 nach anfänglichen Schmerzen endlich als Laster gefunden, das 2 nach Anwendung unterwirft. Riechliche Konzentration von Schweiß insbesondere Blut und Cerebrum, bei anderen strömen Unter gefühlt.

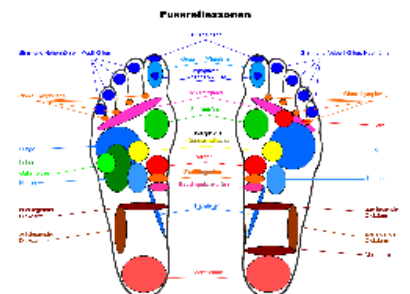

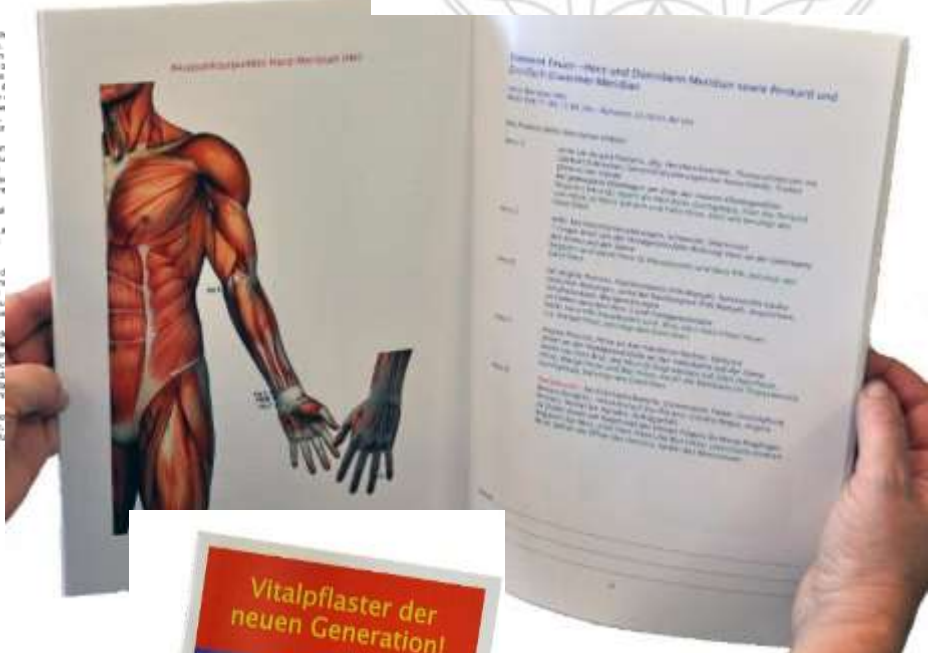

Wenn wir die Pflaster mit der Resonanz (RZ) nach Anwendung haben wir viele Substanzen, die Lebensbedürfnisse nicht oder nur sehr sind: Neurotoxin, von Bore Babesien, Flavonoide, (Flammenschutzsubstanzen), Phthal Acid Salicyl und viele andere.

Darüber ergibt sich die einfache 4 durch Zuführen auf der Fußsohle:

- als Regelbehandlung
- Eingriffung
- als Begleitbehandlung bei d Borelie als Begleitbehandlung
- bei der Anti-Aging Medizin
- bei chronischer Müdigkeit
- bei chronischen Schmerzen

Zur energetischen Anwendung gibt es viel zu sagen; der Behandlung beherrschen und energetisch nutzt der Foot sehr einfach aus: Wie sind gestreift? Wie liegen dort d auf, wirkt es als energetischer Lot d auf ganz dieser Stelle einen V aus?

Ich lasse mit dem Pflaster in eine Akupunkturpunkte und Handtas, die RFT Punkte, alle Ausschneid und alle Stellen, wo der Klient hat.

White light radionics

Vital plasters were audited by the Association of White Light radionicists.

The association is the highest body of radionicists

The measurements are specified as percentages.

0-10% is very harmful for health

11-25% is harmful

25-50% considered less ideal

51-70% is vitalising

71-80% is strongly vitalising

81-90% is healing energy

Over 90% is rare, and is very strong regenerating and healing

100% does not exist – would be pure light!

Result of the Vital plasters: 93%

100% natural and vegan

Meditation

Basic application

Purification intensive application!

- 30 nights with a plaster on each sole of the feet
- Reflexology zones will be activated in this way
- Sleep is improved
- Acid and toxins are actively rejected
- Balance according to the cranio-sacral foundation is created
- Sense of well-being and vitality
- Also ideal for use during periods of detoxification (fasting, treatments, spring time etc.)

Basic application

Acid-alkaline regulation

It is characteristic that, after application, many acids can be measured in used vital plasters.

Instead of consuming "only" alkalines, this application allows for the active drawing out of acids.

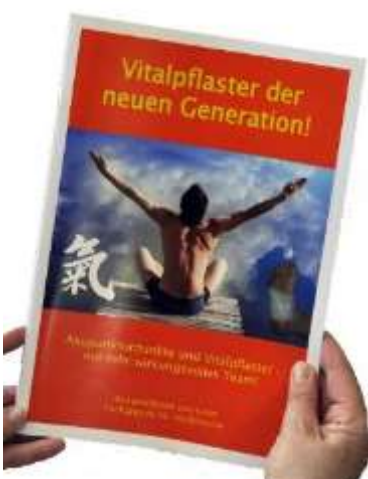

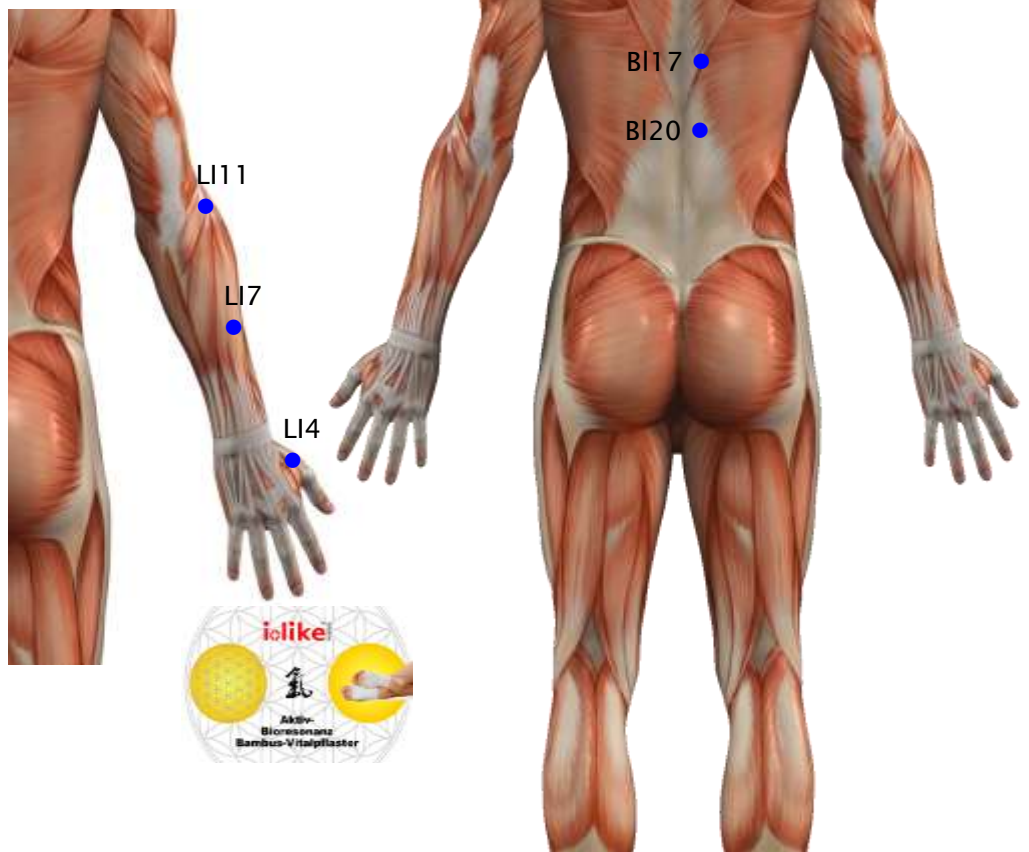

Before using -

Active-Bioresonance Hyaluronic-Vitalserum

i+likeTM
Metaphysik

The Active-Bioresonance Hyaluronic-Vitalserum

- Vitalises, tones
- Increases the skin's tension and radiance
- Bioresonance-enabled
- Balancing of reflexology zones

"Fantastically soft and a great feeling of well-being. After just one month I got complimented on my skin!"

(customer review)

The Active-Bioresonance Hyaluronic- Vitalserum

- Reduction of wrinkles (detected within 28 days by 52%)
- Tripeptide-5 and dipeptides (amino acids) are world firsts in the anti-wrinkle effect!
- to mimic muscular relaxation
- Regeneration of irritated skin
- Supplies moisture and many vital substances
- Tightening the entire skin
- active protection against the weather and environment effects

Metaphysik

The Active-Bioresonance Hyaluronic-Vitalserum

- Hyaluron: world first! Combined long- and short-chain hyaluronic acid!
- Body analogue micelle technique - using this we can combine both hyaluronic acids in a serum!
- Long-chain: preserves and provides the skin with long-lasting moisture
- Short-chain: stimulates the fibroblasts. Collagen can be formed!

The Active-Bioresonance Hyaluronic-Vitalserum

- **Q10**, for the oxidative phosphorylation (energy production by cells), protects against skin aging by binding of free radicals
- **Swiss Alpenrose**; stem cell extract, increases the vitality of the skin stem cells, enhances the regeneration of the epidermis, improves the function of the skin barrier function (protection against environmental factors).
- **Swiss Edelweiss**; strong antioxidant, combats free radicals, protects from harmful influences, protects the connective tissue (acts as an anti-cellulosic), with vitamins A, C and E
- **Pomegranate**; powerful antioxidant, protection from bacteria, detoxifying effect, protection from UV radiation, promotes the repair of damaged cells
- **Bamboo**; highly siliceous (77% share, cell formation), bioresonance charging

Active-Bioresonance

Feel-good mask

Reflexology and acupuncture points have long been, in Asian culture, an important issue when it comes to people's wellbeing. Using a complex system they characterise the relationship between the emotions and the organ system. The reflexology zones play a crucial role in the face, because our face may be referred to as a link between body, mind, soul and the outside world. It is the mirror of our life lived.

Active-Bioresonance Bamboo-AlkalineBath

i+likeTM Metaphysik

Active-Bioresonance Bamboo-AlkalineBath

- With primordial sea salt (halite quality)
- Strongly alkaline (pH 9.0)
- Bamboo and many other active herbs

Wellness-AlkalineBath for a feeling of well-being,
active regeneration and detoxification!

The salt in your bath is important

More than 200 million years ago, beneath the Alps, underground natural salt deposits of exceptional purity were formed out of the primordial seas. It is the highest quality salt possible.

This quality halite crystal salt forms the basis of active Active-Bioresonance Bamboo-AlkalineBath. Enriched with valuable herbs and optimized thanks to the newest Swiss bioresonance technology, this is bath wellness and pampering body care in one.

Through a high pH value of 9.0 the natural osmosis of the skin is activated (toxins, poison) and cell circulation is stimulated.
